Huawei Technologies is a multinational networking and telecommunications equipment and services company.

They are the largest telecommunications equipment manufacturer in the world. First entering the UK market in 2001, they are now mainland China's largest investor into the UK.

At their new headquarters building in Reading, Huawei wanted the **existing lighting** and **control systems** to be **stripped out** and replaced with an up-to-date system. In their place, would be an installation of a **new high output, intelligent lighting** and power system which will be very cost effective when it comes to future layout changes.

Huawei was keen to invest in dimmable luminaires and manual controls in the meeting and boardrooms, enabling them to create the perfect atmosphere, with desired lux levels. This will allow them to customise the room based on different work scenarios and purposes, providing the rooms with multifunctional capabilities.

Comms Room Power  
UPS System
