

The project was
delivered as a **design**
and **build** contract,
ensuring that the brand
represented both **young,**
vibrant and techy environment
alongside **industrial and edgy.**

Playtech London

Building Type: Commercial Property

Project Length: 4 Months

Project Value: £400,000

Playtech are market leaders within online gaming software industry. With their team growing rapidly, they relocated their headquarters to the heart of London. The project was delivered as a design and build contract, ensuring that the brand represented both young, vibrant and techy environment, alongside industrial and edgy.

As their business has grown over the years, Playtech's operations were spread over several different offices, therefore part of their brief was to ensure that this location stood out from the rest of their global offices, while creating a client-facing area with a reception, showroom and boardrooms. One of their focuses for this location was to create a hub that would bring the teams together, under one roof to encourage collaboration and interaction between the multiple teams.

One of the challenges faced through this project was the sheer scale of the reception. As you enter the space, the structural slab shows the 5.5 metre height which makes the space feel cathedral-like. Within this space, LED lighting features were incorporated to create a sense of proportion and vibrancy.

One of their focuses for this location was to create a **hub** that would bring the **teams together**, under one roof to **encourage collaboration** and **interaction** between the **multiple teams**.

Scope of works

Design, Supply and Installation of the following:

Cat A Install

- High level fan coil HVAC system installation
- Installation of Simmtronic intelligent lighting control systems
- Provision of upgraded mains distribution solutions
- Implementation of up-to-date HL&LL cable containment

Cat B Install

- Underfloor power track power supply and end feed unit Eletrak 24
- Cat6 data cabling & IT network Installation
- Provision of small general power solutions, including mechanical supplies
- Integration of LED 60x600 dali flat panels
- Installation of the highest quality feature lighting
- Application of custom Neon LED lighting within reception and corridor areas
