Building Type: Category A building – 'The Gherkin'

Industry Type: Insurance

---

With a history stretching back to the 19th century, this insurance provider employs over 10,000 people and is one of the largest insurers in the UK.

When RSR first arrived at the site, the well known central London building was a Category A specification. Over a **9-week period**, RSR was commissioned to **update and amend** the **existing lighting** layout to suit the **new design of the building**.

Within the open plan office area, suspended luminaires were added to promote a more comfortable working area, with emergency lighting where required. A new power track was installed to aid all general power usage; UPS back-up was established and comms room fit out was completed.

The overall finish was to a high standard and the client's expectations were exceeded.
